Micro Centrifuge Tubes

Micro centrifuge tubes are mainly used for small amounts of sample storage, transport, and centrifugation, and have wide applications such as molecular biology, clinical chemistry and biochemical research. JET BIOFIL micro centrifuge tubes are made of transparent polypropylene (PP) and are ergonomically designed with a snap flat cap that is easy to open and close, and can be operated with one hand.

- Specification: 0.5 mL 1.5 mL 2.0 mL 5.0 mL
- Cap Type: Snap Flat Cap Screw Cap Long-arm Lid Without Cap
- Bottom Type: Conical Self-standing Round
- Color: Natural Blue Yellow Green Rose Red Black
- Packaging: Bag (Box)
- Materials: Polypropylene (PP), conforming to USP Class VI standards

Features

- 4 capacities available: 0.5 mL, 1.5 mL, 2.0 mL, 5.0 mL, recognized according to different colors on the tube body for convenient operation
- Conical bottom, smooth and transparent tube body with clear graduation
- The tube body is designed with a frosted writing area that is convenient for recording
- The sealing cap can be opened and closed repeatedly, which improves sealing performance, prevent liquid leakage, and is easy to operate with one hand
- Maximum RCF of up to 25,000 ×g
- Temperature range: -80°C–121°C (no deformation after high temperature sterilization with the cap open, and remains highly transparency)
- Sterilized and non-sterilized available, sterilized by irradiation to SAL 10^{-6}
- DNase/RNase-free, non-pyrogenic

Micro Centrifuge Tubes(with Snap Flat Cap)

Cat. No.	Capacity (mL)	Bottom Type	Color	Maximum RCF (xg)	Sterile	Package	Qty.Per Bag (Box)	Qty. Per Case

Lid Lock Micro Centrifuge Tubes

Made of transparent polymer, polypropylene (PP), the centrifuge tubes are designed with a lid lock to provide better sealability for sample protection, and to avoid accidental opening of the cap and evaporation of samples during long-term storage, ensuring safe operations.

- Specification: 0.5 mL 1.5 mL 2.0 mL 5.0 mL
- Packaging: Bag
- Color: Natural Blue Yellow Green Rose Red Black
- Materials: Polypropylene (PP), conforming to USP Class VI standards

Features

- Multiple volume and color specifications available,easy for recording and identification
- Conical bottom, smooth and transparent tube with a clear scale to facilitate volume reading
- The tube is designed with a frosted area to record experimental data
- Lid lock prevents accidental opening of cap and evaporation of samples during long-term storage, and ensures safe operations
- Maximum RCF of up to 25,000 ×g
- Temperature range: -80°C–121°C (does not deform after high-temperature sterilization and remains highly transparent)
- Sterilized by irradiation, SAL 10^{-6}
- DNase/RNase-free, non-pyrogenic
